CHAPTER 01

TWO SIDES. ONE HERO.

The friendly neighborhood you grew up with. The dark passenger that took him over for a year. Both made him who he is. Pick a side — but know they both live in him.

WATCH TRAILERS

ABILITIES & ARSENAL

Six radioactive gifts that turned a kid from Queens into a one-person rescue squad.

WALL-CRAWLING

Peter can adhere to virtually any surface using micro-fibers in his fingertips and feet.

SPIDER-SENSE

A precognitive tingle warns him of incoming danger milliseconds before it lands.

SUPERHUMAN STRENGTH

He can press over 10 tons, deck the Hulk, and stop a runaway train with two strands of webbing.

WEB-SHOOTERS

Self-engineered wrist devices that fire chemically synthesized webbing of nearly unbreakable tensile strength.

REFLEXES & AGILITY

Reflexes 40x faster than a normal human; he moves like a hyper-caffeinated acrobat through skyscraper canyons.

GENIUS INTELLECT

Doctorate-level brain in physics, chemistry and engineering — he literally invented his own webbing formula in high school.

BIOGRAPHY

Norman Osborn was a ruthless industrialist and the cold, calculating father of Peter's best friend, Harry. Driven by an obsession with power and a hunger to outshine his rivals, Osborn experimented on himself with an unstable performance-enhancing serum derived from his stolen formula.

The explosion that followed left him with superhuman strength, accelerated reflexes, and an enhanced — but utterly fractured — intellect. He fashioned a goblin costume, weaponized a personal glider, and unleashed a private war on Spider-Man.

His most unforgivable act came on the George Washington Bridge in 1973, when he murdered Gwen Stacy — a wound Peter Parker has carried for fifty years. Osborn has died, reformed, lost his memory, regained it, run the U.S. defense agency H.A.M.M.E.R., and remains the single villain Spider-Man can never truly defeat.

DOCTOR OCTOPUS

TO OCTAVIUS

Genetic atomic researcher fused to four sentient mechanical arms after a fusion accident. A genius with eight limbs and zero patience.

ICONIC SUITS

Six decades of fashion choices. Some hand-stitched, some bought from a costume shop. Some Stark, some not.

CLASSIC RED & BLUE

1962 — TODAY

The original. Hand-stitched by Peter himself in a Queens basement. Black web pattern, oversized eye lenses, and a logo that's outlasted four U.S. presidents.

BIOGRAPHY
Mary Jane Watson grew up in a broken home with an abusive father, and built her dazzling, world-conquering personality as a defense mechanism. Her famous first line — 'Face it, tiger... you just hit the jackpot' — entered comic history the moment it left her lips.

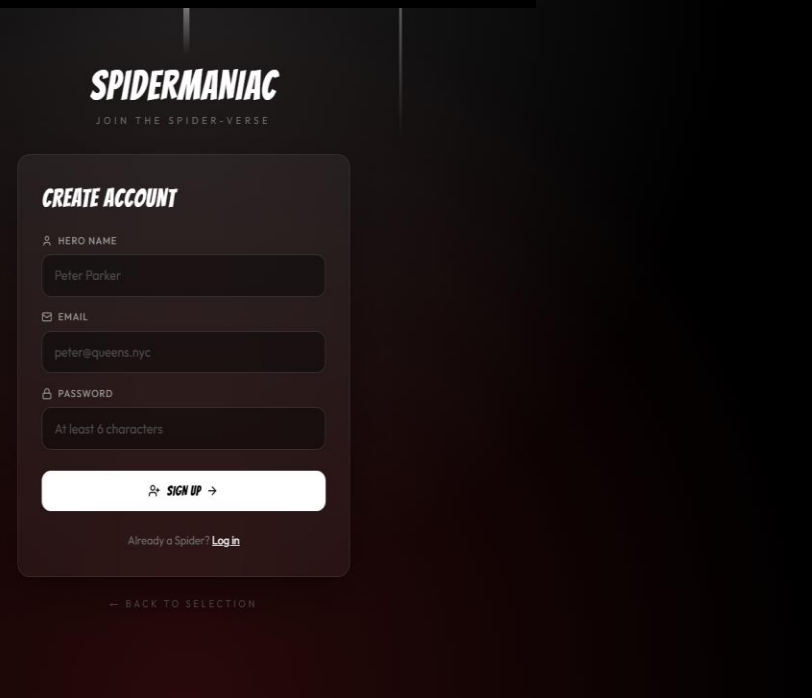

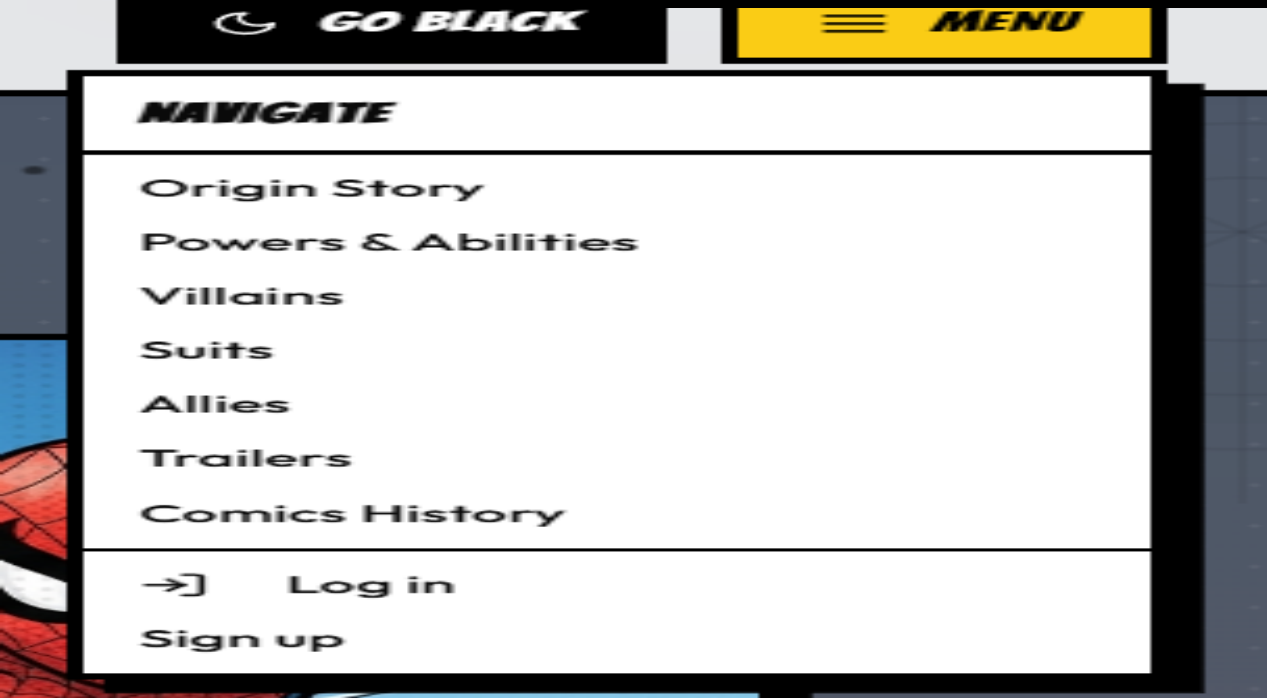

Behind the bombshell exterior is one of the smartest, toughest characters in the Marvel universe. MJ figured out Peter's secret long before he told her. She didn't just accept it — she chose to stay, knowing exactly what loving Spider-Man would cost her.

Across sixty years of comics, films, and animations, MJ

Μέθοδοι που χρησιμοποιήθηκαν

- ****BACKEND****
 - - Python + FastAPI για το REST API
 - - MongoDB για τα δεδομένα
 - - Motor (async driver)
- ****FRONTEND****
 - - React 19 για το UI
 - - Tailwind CSS για το styling
 - - Shadcn UI για modals και dropdown
 - - Lucide για τα εικονίδια
- > *Σύγχρονα εργαλεία, μηδενικές βαρετές αποφάσεις. Κάθε τεχνολογία επιλέχθηκε για συγκεκριμένο λόγο.*
- **### Προτεινόμενο visual**
 - - Logos των τεχνολογιών σε γραμμή (React, FastAPI, MongoDB, Tailwind, Shadcn)
 - - Ή ένα απλό διάγραμμα 3-tier αρχιτεκτονικής (frontend → backend → database)
- > Για το server κομμάτι διάλεξα Python με FastAPI — επειδή είναι γρήγορο, έχει αυτόματη τεκμηρίωση και σύγχρονο async μοντέλο. Για τη βάση πηγα MongoDB γιατί τα δεδομένα μου ήταν εμφωλιασμένα: ένας χαρακτήρας έχει βιογραφικό 3 παραγράφων, λίστα συνεργασιών, εικόνα — όλα φυσικά σε ένα JSON. Για το frontend, React με Tailwind, που μου επέτρεψε να φτιάξω comic-book design χωρίς να γράψω 2000 γραμμές CSS.
